
RLA2 (μ^-) at $L = 1300$ km: survival of the born flavors
$\nu_\mu \to \nu_\mu$: 4.18e+05 of 4.39e+05 events / yr survive (0.952, same events)
$\bar{\nu}_e \to \bar{\nu}_e$: 1.69e+05 of 1.7e+05 events / yr survive (0.994, same events)
unoscillated, MINT
oscillated, MINT
unoscillated
oscillated
GENIE sample, unoscillated
same events, oscillated
